56.11001 – Safe Access	1	7	8
56.20003(a) - Housekeeping	1	4	5

Citations by Fatal Risk Theme

# PFE 2020 - 01

- Haul truck went over the edge of a stockpile
- No injuries
- PFE - 2020 - 1 - MOR HT Low Berm

# Round Stock Management

- Round Stock Management
- Outlines requirements for handling, storage and transport of materials that can roll and crush an employee
  - Pipes, coiled/wound material, rolled liner, poles, drill steel, etc.
- HDPE pipe is excluded from the scope
- 50' Safe Zone
  - Intended to prevent people from being in a potential crush zone should material roll and fall from trucks.
    - May be a smaller zone based on the specific areas where these activities take place.
- Safety Watch
  - No training will be developed.
  - A competent person should understand the policy and be able to train spotters to perform these functions.

# Safety Success – CERTEX Sling

### What is the Aquifer Protection Permit (APP)?

- Morenci's APP applies to the entire property and requires measures to reduce the migration of pollutants to the underlying aquifer and to ensure that best practices are being applied.

### What to know about the Aquifer Protection Permit...

- The APP consists of these facilities:
  - Stockpiles,
  - Tailings,
  - Wash Racks,
  - Diversions,
  - Wells,
  - Sumps,
  - Wastewater Treatment Plant,
  - Surface Impoundments/Ponds
- Inspections and/or monitoring are conducted on a frequent basis to comply with regulatory requirements laid out in the permit.

### What you can do.....

- Notify Environmental Services and submit an MOC when:
  - working in areas with wells, the work being done could affect the operations of the well
  - moving the location of a sump

### More Information.....

- Use only approved detergents in the wash racks

# Active Shooter

- <https://en.tempo.co/read/917990/shots-fired-at-foreign-freeport-employee-in-tembagapura-papua>
