

PURPOSE

As per the Title V Air permit for Morenci "The Permittee shall maintain and use the covers on the mixer settler tanks (except for the settler tanks associated with the Modoc Test facility) to control emissions from the solution extraction systems.

SCOPE

The covered roofs include several small hinged hatches that may be lifted open to give operators access to observe conditions, collect samples, and perform maintenance but must remain closed at all other times.

PROCEDURE

Hatches at the Modoc, Metcalf, South Side and Central SX plants may be lifted open to give operators access to observe conditions, collect samples, and perform maintenance

Hatches must remain closed at all other times

EMPLOYEE TRAINING

All personnel shall receive training or at the least have access to this BMP when working with the covered roofs.

The Supervisor and/or Department Environmental Representative must provide this training.
