

Why is Spill Prevention Important?

- To meet the regulatory guidelines of Freeport-McMoRan, ADEQ and the EPA.
- Invest in your safety as well as others around you because spills can be hazardous.

Your Role:

- Secondary Containments
 - Must be able to hold 110% volume of single largest container within containment area.
- Tanks/ Containers
 - Look for seepage/leaks, over topping and structural integrity.
 - Look for proper labeling and placement.

SPCC: Spill Prevention, Control & Countermeasure

Report all spills outside of normal operations. If you find a spill, please contact the Spill Hotline 865-SPIL (7745), or Supervisor. Environmental Services (928) 865-6000
