

December 2019

All Equipment being stored is required to be up off the ground on pallets, concrete or asphalt to help facilitate inspections and any observations of leaks from the equipment.

- **Short-Term Storage (periods under one month)**
  - A visual inspection must be made before temporarily storing any equipment
- **Long-Term Storage (periods over one month)**
  - All unnecessary fluids must be drained before equipment is stored (unless required to retain the integrity of the equipment)
  - A monthly visual inspection must be conducted and recorded on the Equipment Storage Tags attached to the equipment. (Tags are available from Hagameyers Safety Supply)

★ Refer to BMP 332 – Equipment Storage Management for additional information
