

## BMP 313 – Drum & Container Management

- **PROPER LABELING:** All containers, tanks, drip pans, secondary containments, and any other containers used to hold materials must be clearly labeled with contents or marked “Empty”.
- All drums/containers must be stored up off the ground at all times on pallets or other similar means.
- All drums/containers storing liquids must have a lid. Containers storing materials should have a lid & holes drilled in bottom of container.

### ***Did you know...***

***Unlabeled containers can result in extensive material testing costs, expensive clean up fees & large fines!***
