

# ENVIRONMENTAL MONTHLY GREEN SHARE

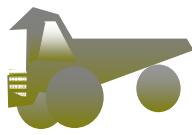

## Morenci Spill Share Spill Notification & Cleanup BMP 400, 402

- What is a Spill?**
- The loss of product or waste (including raw water lines) outside of normal operations.
  - Can result from both uncontrolled and controlled events.
  - Can occur anywhere, including secondary containment or even stockpiles.

### Spill Reporting (BMP 400)

ALL spills are called into the Spill Hotline number.

**What if I work in the mine and use the radio system to communicate?**

Contact either:

- Immediate Supervisor OR
- The Command Center

- They will contact the Spill Hotline for you -

**What if no one can be reached at the Spill Hotline number?**

Contact an Environmental Services representative by using the Weekly On-Call List posted on the Environmental Sharepoint site.

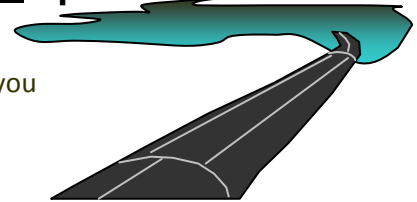

**Do I report ALL spills?**

**Yes – ALL spills must be called into the Spill Hotline immediately after becoming aware of them.**

### Why Should I Call the Spill Hotline Number for ALL Spills?

The Spill Hotline Attendant:

- Generates spill reports and contacts Environmental Services for you
- Tracks all spills for internal & external reporting if necessary
- Helps ensure that all spills are properly cleaned up

**Spill Hotline #: 928-865-SPIL (865-7745)**

### Spill Clean Up (BMP 402)

Spill cleanups are typically coordinated by the individual department unless the Environmental Department advises you otherwise. **ALWAYS** ask for help if you have any questions.

In the mine, contact Burk's Sanitation if you need assistance. Burk's is contracted to perform routine spill cleanup at specific areas such as the Q points and fuel docks.

In the processing areas, contact the Surface Department if you need assistance cleaning up a spill.
