

ENVIROGRAM

Renovation & Demolition Notification for Asbestos and/or other Materials

An Asbestos survey and necessary abatement is required prior to the start of any renovation/demolition projects. Morenci Environmental Services must be notified before the start of any such project.

Please ensure that all contractors & FMI employees in your area are aware of this requirement before they begin any renovation and/or demolition activities.

Remember to submit a MOC – Management of Change request for renovation and/or demolition projects.

(PLEASE NOTE: ALL demolition projects require notification to the state of Arizona before demolition can begin.)

- FMI employees and site Contractors are responsible for reporting these kinds of activities.
- There may be a variety of testing and/or monitored that should be conducted in these areas before working – including but no limited to: lead, asbestos, mold, heavy metals sampling, etc.

For further information see BMP 301 – Renovation & Demolition Notification. You can assess this document by visiting our website at: <http://fmweb/Sites/EMS/mor/Shared%20Documents/Forms/AllItems.aspx>

If questions, contact Environmental Services at 928-865-6000
