

# Environmental Share Sewer System Health

- Paper towels/wet wipes have many uses on-site and at home
- However when disposed of incorrectly, they
  - clog sewer systems, septic tanks and wastewater treatment plants,
  - plus increase maintenance costs when replacing motors, unplugging sewer lines/septic tanks, etc.
- Please DO NOT flush paper towels/wet wipes down the toilet or throw into the porta-johns
- Please throw all paper towels/wet wipes into a trash can
- Paper towels/wet wipes do not break down; toilet paper is designed to disintegrate in water
