

# Environmental Share Dust Management

**What:** FMI Morenci's Title V Air Quality Permit requires that reasonable precautions are employed to prevent excessive dust from becoming airborne.

**Who:** All employees are required help prevent dust emissions from becoming airborne.

**Where:** All areas of the mine, including any process or operating equipment (conveyors, dust collectors, crushers, shovels, etc.), unpaved roads, tailings dam, stockpiles, etc.

**Questions? Or need more information call:  
Environmental Services 928-865-6000**

**When:** Anytime an activity has the potential of generating emissions, or when emissions are occurring, please take necessary action(s) to mitigate the severity immediately.

**How:**

- ❖ Drive to the conditions of the road (15mph dry/dusty conditions).
- ❖ Call for water truck when excessive dust is observed.
- ❖ Emissions from conveyor belts, transfer points, pollution control equipment, or stockpiles, please contact a control room operator and request for water application.
- ❖ Manage any piles of accumulated dust by contacting the area supervisor to vacuum or remove it.
