- Facilities
- Emergency Exits/Meeting Point
- Cell Phones
- Safety Share
- This months focus
 - Special Presentation
 - NONE
 - Environmental Share
 - ADEQ
 - Contractors Health and Safety Manual
 - Contractor On-Boarding/Incident Reporting
 - Weekly Safety Systems Audit
 - Contractors Safety Manual
 - All Contractors that use or manage radiation, please submit contact information.

Why is Spill Prevention Important?

- To meet the regulatory guidelines of Freeport-McMoRan, ADEQ and the EPA.
- Invest in your safety as well as others around you because spills can be hazardous.

Your Role:

- Secondary Containments
 - Must be able to hold 110% volume of single largest container within containment area.
- Tanks/ Containers
 - Look for seepage/leaks, over topping and structural integrity.
 - Look for proper labeling and placement.

SPCC: Spill Prevention, Control & Countermeasure

Report all spills outside of normal operations. If you find a spill, please contact the Spill Hotline 865-SPIL (7745), or Supervisor. Environmental Services (928) 865-6000

What: Morenci's Title V Air Quality Permit requires that reasonable precautions are employed to prevent excessive dust from becoming airborne.

Who: All employees and contractors are required to help prevent dust from becoming airborne.

All areas of the mine, including:

- Blasts
- Conveyors
- Unpaved Roads, etc.

When: Any dust is occurring, take necessary action(s) to mitigate immediately.

How:

- ❖ Drive to the conditions of the road (15mph when dry/dusty conditions)
- ❖ Call for a water truck or water application
- ❖ Contact the control room operator and request water application or a water truck
- ❖ Manage piles of accumulated dust fines (vacuum or remove it)
- ❖ Call or notify Environmental Services Department

**Questions? Or need more information call:
Environmental Services 928-865-6000**

Manpower Reports

Please have your manpower reports in by the 10th of each month.

Thanks,

Contractor On-Boarding

All contract companies must be on-boarded here at the Morenci site. This includes **all sub-contractors**.

Freeport departments (GSC, Environmental, Safety and Training) will ensure the on-boarding of all General Contractors.

The **General Contractor is responsible** to ensure ALL of their sub's are on-boarded with the same process and departments.

Contractor On-Boarding

This year we are stressing the importance of this sub-contractor on-boarding to all the General Contractors.

All contractors found on-site that are not on-boarded completely will be immediately escorted off property.

Please ensure you on-board all of your sub's,,,, Thanks

Incident Reporting

All employees shall promptly report any incident (including near-misses), no matter how slight, to their supervisor. All incidents shall also be reported to the Freeport-McMoRan Safety Department immediately.

Incident Reporting

A completed “Incident Reporting Form” must be provided to the Freeport-McMoRan site Safety Department promptly of all injuries, regardless of severity. Contractor needs to coordinate record information and details of an incident using the site Incident Report form.

Incident Reporting

Failure to promptly report a workplace injury, illness or significant event may result in cancellation of the contract.

Incident Reporting

Incidents of a serious nature may require “immediate” notification to government agencies. It is the responsibility of each contractor to ensure its leaders identify what incidents require “immediate” notification and maintain a list of numbers of who must be notified, and the time limits required (15 minutes in some cases with MSHA). If time permits a brief call to Freeport-McMoRan representatives will be made prior to notifying agencies such as MSHA. In some cases the site may make the call to the agency. Check with local site H&S for site-specific requirements.

3 Prioritized Safety Goals

- 1.Prevent Fatalities*
- 2.Reduce Incident Severity*
- 3.Improve Continuously*

What has been noticed this lately?
